1. During a new survey it was established that 61 out of 95 workers (64%) employed as testers of boilers by the railroads in the Soviet Zone were members of the SA and SS (Nazi Storm Troopers and Elite Guard).
2. It was therefore found necessary to initiate new courses in which additional men will be trained for this trade, while the training of those workers who have completed the preliminary (theoretical) stage will be speeded up so that they may be used as soon as possible as full fledged testers.
